EXPERIENCE SUMMARY

A dedicated **Full Stack Developer** with **4+ years of experience** in **Java**, **Spring Boot**, **Hibernate**, **Microservices**, **Python**, and **Django**. Skilled in developing **REST APIs**, **Secure Web Applications**, **Database Integration**, and **Automated Testing** using **Selenium WebDriver**. Proficient in **HTML**, **CSS**, **JavaScript**, **Angular**, **MySQL**, **Oracle**, **Git**, **Maven**, and **Agile Development Practices**. Strong experience in building **Scalable Applications**, optimizing performance, and delivering **High-Quality Software Solutions** throughout the **Software Development Life Cycle (SDLC)**.

TECHNICAL EXPERTISE

Languages: Java, Python, JavaScript.
Frameworks: Spring, Spring Boot, Hibernate, Microservices, Django.
Web Technologies: HTML, CSS, JavaScript.
Web Services: RESTful Web services(JAX-RS), SOAP(JAX-WS), Postman.
Automation Tools: Selenium.
Databases: MySQL, Oracle.
Build & Version Control: Maven, Git.
IDE/Tools: Eclipse, STS, VS Code, Jupyter Notebook
Productivity Tools: Microsoft Word, Excel, PowerPoint.

EMPLOYMENT HISTORY

Software Developer – Innerspec Technologies Pvt. Ltd.

Bangalore, Karnataka| Duration: Dec 2024 – Sep 2026

Associate - eHotel Software & IT Pvt. Ltd.

Visakhapatnam, Andhra Pradesh | Duration: Mar 2024 – Nov 2024

Java Full Stack Developer – Globe Infotech Pvt. Ltd.

Chennai, Tamil Nadu | Duration: Jun 2022 – Feb 2024

EXPERIENCE OVERVIEW

Project 1: Adapter Development for First Horizon Bank (USA).
Role: Developer

Technology Stack: Java 11, Spring Boot, Microservices, REST API, MySQL, Oracle, AWS, Docker, Git, Jenkins

Description: Adaptive Bank is a retail banking platform developed to enhance customer experience through real-time digital banking solutions. It integrates customer data, transactions, and service modules into a unified architecture using Microservices, ensuring high performance and security.

Responsibilities:
• Designed and developed **Microservices** using **Java** and **Spring Boot** for modular scalability and high availability.
• Implemented **RESTful APIs** for capturing and transmitting real-time banking event notifications (e.g., user logins, failed logins, account updates) to downstream systems.
• Utilized **Spring Security** and **JWT** for secure authentication, authorization, and session handling.
• Configured **Spring Cloud components (Eureka, Config Server, API Gateway)** for distributed service discovery and centralized configuration management.
• Deployed and containerized applications using **Docker**, enabling consistent build environments.
• Collaborated with database teams to **optimize SQL queries** and ensure efficient data exchange between **Oracle** and **MySQL** databases.
• Participated in **Agile sprint planning**, stand-ups, and code reviews to ensure high-quality deliverables.
• Conducted **unit testing** and **integration testing** to ensure reliability and maintainability across microservices.

Project 2: Score Sharp – Online Exam Portal
Role: Developer

Technology Stack: Java 11, Spring Boot 2.7, Spring JPA, Angular, REST API, MySQL, Maven, Postman, GitHub
Description: The online exam portal is a comprehensive web-based application designed to facilitate educators in creating and conducting online exams for students. Its primary objective is to provide a user-friendly platform that enables educators to effortlessly create exams, set questions, and evaluate exam results.

This project has three modules – Registration Section, Admin and Candidate.

Responsibilities:
• Developed **RESTful APIs** using **Spring Boot** for **user registration**, **authentication**, **exam management**, and **result processing**.
• Designed and implemented **database entities**, **relationships**, and optimized queries using **Spring JPA** and **MySQL**.
• Integrated **Spring Boot Actuator** for health checks, logging, and performance metrics.
• Implemented **Spring Security** for role-based authentication and session management.
• Designed database entities and relationships using **Spring JPA** and optimized queries for

performance.
• Implemented **exception handling**, **request validation**, **pagination**, and **logging** to improve application reliability and performance.
• Created and executed **automated test scripts** using **Selenium WebDriver** and **Java** to validate critical business workflows.
• Automated **end-to-end test scenarios** including **user registration**, **login**, **exam creation**, **exam participation**, and **result generation**.
• Performed **functional testing**, **regression testing**, and **smoke testing** using **Selenium** to ensure application stability after new feature releases.
• Developed **reusable automation utilities** and **test components**, reducing manual testing effort and improving test coverage.
• Used **JUnit** and **Selenium** to validate application functionality and identify defects during development and testing phases.
• Conducted integration and regression testing using **Postman** and **JUnit**.
• Used **Maven** for build automation and managed dependencies efficiently.
• Collaborated with the QA team for bug fixes and ensured test coverage before deployment.
• Deployed application updates to test and production servers via **Git** and version control workflows.
• Participated in **Agile sprints**, daily stand-ups, and sprint retrospectives ensuring smooth delivery cycles.
• Coordinated with cross-functional teams to identify business needs and implement feature enhancements.

Project 3: Simple Learn – Trainee Management System
Role: Developer

Technology Stack: Python 3.10.7, Angular 13.3.0, MySQL, Vs-Code, Postman, GitHub

Description: The project describes about the management of a training institute. The aim of this project is to track the progress, performance and development of trainees throughout their training.

1. The application allows trainees to register their details, including personal information, educational background, and training preferences. The system enables administrators or trainers to create and manage training programs.
2. The application provides a dashboard for administrators, trainers, and trainees to monitor and track the progress of trainees by conducting practical tests and giving assignments.

Overall, the Trainee Management System simplifies and enhances the management of trainees, ensuring effective training, accurate progress tracking, and improved outcomes for both trainees and the organization.

This project has three modules – Registration Module, Admin and Batch Module.

Responsibilities:
• Responsible for developing and maintaining **middleware components** using **Django** and

implementing business logic for application workflows.
• Utilized **Django ORM** for efficient **database operations**, including CRUD functionality and query optimization.
• Designed and developed responsive **web pages** using **Angular**, **HTML**, **CSS**, and **JavaScript**.
• Integrated frontend components with backend services to provide dynamic and user-friendly interfaces
• Worked with **MySQL** and **Oracle** databases to manage application data and improve query performance.
• Identified, tracked, and resolved defects by collaborating with development and QA teams.
• Participated in **code reviews**, debugging, and performance tuning to improve application quality.
• Managed source code using **Git** and followed version control best practices.
• Participated in **Agile sprints, daily stand-ups, and peer code reviews** to ensure timely and high-quality deliverables.

EDUCATION

Bachelor of Science (Computer Science) – Andhra University | Year of Completion: 2021

CERTIFICATIONS & RECOGNITIONS

• Recognized for **outstanding performance** in ScoreSharp project delivery.
• Recognized as a **'Rising Star'** for performance excellence at eHotel Software & IT Pvt. Ltd. (2024)

LINGUISTIC ABILITIES

English, Telugu
